Delightful

Delightful is an iOS client for Trovebox (previously Open Photo) service.

Trovebox is an excellent open source online photo storage service. With Trovebox you can easily manage your photos, quickly import photos from other services, and even collect photos from your friends! And since it's open source, you can run it on your own server and your own cloud storage.

Delightful makes viewing your photos in Trovebox from your iPhone enjoyable. Delightful's playful and intuitive user interface makes it easier than ever to browse your photos collection.

Delightful Features

1. **Pinch in/out to see less or more photos.**
2. **Photos are grouped by date taken.** Just like iOS Photos app.
3. **Show camera data and location's name** if location data is available for each photo.
4. **Save to favorites.** If you have tons of photos like me, it's hard to find a certain photo. If I find a photo that I'd like to see again quickly in the future, but I don't want to save it to camera roll, I can just simply mark it as "Favorite".
5. **Easy to access albums and tags.** Simply swipe right and the albums/tags drawer will appear.

FAQs

How much does Delightful cost?

Delightful for iPhone costs \$1.99.
